

### INTEGRATED RISK MANAGER CAM Management Solutions

# RISK MANAGEMENT THAT IS INTEGRATED INTO YOUR CORPORATE, OPERATIONAL AND PROJECT MANAGEMENT

CAMMS Integrated Risk Manager reduces the impact of risks to your organisation through effective identification, profiling, assessment and management of risks.

Utilising the Integrated Risk Manager, risks are developed in an interactive and real time environment, within a fully tailored framework that is flexible enough to reflect your current and future risk processes.

More than risk identification – The Integrated Risk Manager enables organisations to manage their risks and visually see the impact of implementing risk mitigation initiatives. With a fully automated electronic mitigation process, no risk will fall under the radar.

#### EXPERIENCE THE BENEFITS OF:

- A fully integrated risk management process aligned to your planning and reporting framework
- Real time savings and cost effective implementation
- Tracking against risks individually and against the planning and organisational hierarchy
- Facilitation of good management decision making by capitalising on opportunities as well as mitigating risks
- Simple to use functionality which is consistent across every page and risk
- Increased user buy in and participation through an interactive approach to the management of risks
- Maximised flexibility to meet changing requirements
- Compliance with good governance frameworks

## **KEY FUNCTIONALITY:**

- Easy to use interface with granular security
- 'At a glance' snapshot views of your risks and risks against hierarchy levels
- Fully flexible configuration with settings that tailor make the solution to suit your needs
- Develop risk mitigation action plans and report progress against them
- Risk system alerts to ensure high risks are identified, monitored and treated
- Electronic reminder alerts to increase the control over risk management
